

WHAT IS THE VISION OF CAI?

We wish that Christians in the workplace give examples of respect for each other and with external partners. Appreciation of the counterpart and honesty should be a matter of course and also be visible in the cooperation with our colleagues in the different regions.

We hope that Christians will not only remember and live their Christian values during the weekend, but also in their everyday life. We are convinced that this attitude also contributes to sustainable company success and fairness among competitors.

WHO IS BEHIND CAI?

Christians in the automotive industry belong to different churches, which have united in ecumenical union in the work community of Christian churches in Germany. In the sense of the Bible, they accept their responsibility towards God and their fellow human beings as committed Christians.

WHAT IS CAI?

(CHRISTIANS IN THE AUTOMOTIVE INDUSTRY)

CAI is a network of Christians who are working in the automotive industry and their associated companies such as banks, trading companies, insurance companies and suppliers out of conviction and commitment. Our goal is that fundamental Christian values become visible in the personal working life within companies and in the social responsibility outside the company.

WHAT IS CAI DOING?

We support the foundation and support of prayer and conversation circles. Questions concerning the working day on the basis of Christian values and prayer for the concerns of employees and the company are the focus of these groups. We meet outside of businesses in the vicinity of different company locations. Together, we invite you to take part in lectures, seminars and workshops.
